EDUCATION

BROCK UNIVERSITY
BSC IN COMPUTER SCIENCE
Apr 2021 | St Catherine, CA
Minor in business
Competitive programmer
ICPC 2021 competitor

JOHN FRASER SS
HIGH SCHOOL DIPLOMA
June 2017 | Mississauga, CA
ROPSSAA Table Tennis Gold

UDEMY COURSES

200+ HOURS
The Complete JavaScript Course
Intermediate JavaScript (ES6)
React: The Complete Guide
MERN Stack Front to Back
Build a Full Stack React Native App

MATERIAL COVERED

COMPUTER SCIENCE

Object Oriented Programming
Software Engineering
Web Development
Database Systems
Time Complexity Analysis
Space Complexity Analysis
Algorithms
Parallel Computing
UI/UX Design
Networking Security
Computational Theory
Operating Systems

SKILLS

PROGRAMMING SKILLS

JavaScript • HTML5 • CSS3 • SQL
MongoDB • React • React Native •
Express • Node.js • Git

SOFT SKILLS

Team Player • Public Speaking •
Supportive • Motivator

SPECIALTY

REACT / REACT NATIVE

EXPERIENCE

ALFAN GROUP | FRONT END DEVELOPER INTERN

Jan 2019 – Aug 2019 | Oakville, CA

- Responsible for developing Front End applications utilizing React.js.
- Awarded for Outstanding Service in Quarter 2, 2019.

WORK PROJECTS

INFLUENCER CALCULATOR | FULL STACK APP

May 2019 | Alfam Group

- Developed a React.js and Express.js web application used by marketers for in depth analysis on influencer performance analytics and expected compensation for advertisements.
- Optimized MVP application flow for space and time efficiency by minimizing API calls and storing only needed data in components.

COMPANY EMAIL SIGNATURE | FRONT END APP

Feb 2019 | Alfam Group

- Developed React.js web application used to generate email signatures for employees on a click of a button based on the input given by the user.
- Implemented given design into the application to dynamically generate email signatures based on the desired layout.

PERSONAL PROJECTS

OURCHOICE | FULL STACK APP

Jan 2021 | github.com/mzfattal/OurChoice

- Developed a React Native and Express.js mobile application that enables multiple users to view and select nearby restaurants to match a group to a mutually agreed upon restaurant.
- User and group data is stored in MongoDB and is fetched securely through a API developed in Express.js.

UASSIGN | FRONT END DEVELOPER

Feb 2021 | Senior Project

- Developed the front end of a E-Learning platform built to automate the marking of technical assignments by running test cases on submitted code.
- This project utilized React.js and TypeScript on the front end.

PERSONAL PORTFOLIO | FRONT END APP

Aug 2020 | github.com/mzfattal/mzfattal.github.io

- Developed a front end static portfolio utilizing Bootstrap to display my experience, technical skills, and projects.

KATTIS | COMPETITIVE PROGRAMMING

2020 - 2021 | github.com/mzfattal/kattis

- Developed an understanding of data structure and problem solving abilities to solve technical problems.
- Competitor in ICPC 2021 and member of the competitive programming team at Brock University
